Patents	0	8	0	RED	- Patents Granted: Not submitted - Patent Commercialization: Not submitted
Student Placement	0	5	0	RED	Graduate Placement Rate: Not submitted
Alumni Connect	0	4	0	RED	- Alumni Registration: Not submitted - Alumni Grant Mobilization: Not submitted
TOTAL		100	9	CRITICAL	

2. Executive Summary and Data Alert

- Overall score: 9/100, AT RISK. One AMBER (Curriculum); nine RED (all others). Only curriculum alignment data was submitted; no other domain data is available for this assessment cycle.
- UG alignment stands at 76% (19 of 25 programs restructured). Six UG programs remain outside CCFUGP, with meaningful reform progress already demonstrated at the undergraduate level.
- PG alignment is below half at 47.7% (21 of 44 programs restructured). Twenty-three PG programs have not been restructured — more than half the postgraduate portfolio remains outside CCFUGP.
- Total programs recorded is 112, but curriculum alignment data covers only 69 (25 UG and 44 PG). The remaining 43 programs have no alignment data submitted and cannot be assessed.
- Data for 9 of 10 parameters is entirely absent. The score of 9/100 does not reflect actual institutional performance — it reflects the near-complete absence of submitted data. GJU must submit all missing domain data immediately.

**CRITICAL:
Incomplete Data
Submission**

Data for Flexibility, MDC, Skill, Environmental, Community, Research, Patents, Placement, and Alumni was not submitted. Nine parameters score zero as a result. GJU is a large institution (112 total programs) and cannot prepare credible NAAC, NIRF, or UGC submissions without complete data. Submit all missing fields within 14 days.
